AquaMedia Rocks Up At London Boatshow

Dear Partner

Digital Yacht will launch the AquaMedia AQM200 entertainment server to the UK market at the London Boat Show launch event, 1pm Friday 9th January. Please call by stand A079 to see the technology in action. As a partner, you can download the preview launch pack from the "Attached" link below.

AquaMedia is an on-board media server designed to bring the latest in entertainment technology to your boat. Playback music, video, pictures or internet TV and integrate with your audio and TV systems. With a stunning, easy to use interface and blisteringly fast processor, AquaMedia brings you

the best and latest in media entertainment afloat. Simply step on board and plug in your USB pendrive or hard disk that contains your audio, video and photo media for on board playback. AquaMedia will quickly index the drive and logically arrange the media through its custom Razor operating system.

It's super compact, silent and totally solid state and it is powered direct from the boat's DC system so there's no need for inverters. Connect AquaMedia via HDMI to your choice of TV or display or via an AUX connection to the boat's audio system – this allows your existing stereo and speakers to integrate with the latest digital entertainment. AquaMedia can support up to two HDMI video connections with independent resolutions allowing one system to offer saloon and cabin playback.

Connect to the internet for web and internet TV functionality via built in wifi or through the WL510 high power wifi solution from Digital Yacht. It has a wired network connection too for integration with bigger networks. AquaMedia also supports audio playback via AirPlay on iOS devices like iPhones and iPads. The menu also offers support for up to 4 IP video cameras allowing the TV to offer security, navigation or thermal camera views. Suggested retail price is £895.00 ex vat.

AquaMedia is an exciting new category in the marine electronics market so make sure to see the opportunities during the London event

The Digital Yacht Team
