Digital Yacht 2020 Euro Price List & New Products

Dear Partner

Our latest 2020 EURO Price List is now available to download as a PDF from [HERE](#) or from [HERE](#) as an Excel file. You can also click on the download link below. This becomes effective 2nd January 2020 and there are both price increases and reductions across all product lines.

New products include:

GPS160 - Our award winning TriNav sensor with GPS, Glonass and Galileo capability and a unique MOB function too plus availability with multiple interfaces such as NMEA 0183, NMEA 2000, SeaTalk and wireless.

iAISTX - Value priced, high performance AIS Class B transponder with wireless interface designed for the growing base of navigation app users on iPads and tablets

WL510R - New hi power wifi access system for shore-side hotspots with integrated router

CLA2000 - Fully approved Class A AIS transponder with colour display and advanced features

We also want to confirm our trading capability regardless of the outcome of the frustrating Brexit scenario. Digital Yacht have wholly owned trading subsidiaries in France and Ireland and in the event of disruption, we'll move our sales and logistics for any affected partner to the best possible location. We may need you to switch orders to these entities but prices (always billed in €), freight costs and delivery transit times will remain unchanged.

We'll also continue to work with our two premium logistics partners, DHL and Fedex to make sure we offer timely and competitive deliveries regardless of location.

In summary, we're confident that any changes will be seamless and we'll be ready and open for easy business. We look forward to working with you in 2020
