Improve your wifi afloat with Digital Yacht's new affordable WL70R system

A new, competitively priced hi power wifi solution is now available from Digital Yacht called the WL70R

The system uses the well proven, WL70 1.25m wifi antenna (details [HERE](#)) and ships complete with a compact, DC powered wireless router called iKConnect. This creates a local wifi network on board the boat allowing mobile devices like phones, tablets and laptops to share the connectivity of the long range wifi antenna - effectively allowing multiple devices and users to share the internet connection.

The WL70 features a hi power modem integrated into the rugged 15dBm antenna. It's self powered from a USB connection - either direct to a PC/MAC or via the iKConnect router in the new WL70R bundle making installation really easy.

WL70R bundle features:

- Rugged 1.25m 15dBm antenna with industry standard 1" mount compatibility
- Super compact iKConnect router with direct 10-18V DC power connection
- Simple to use web interface for setting up and connecting to hotspots
- Offers typically 15-20x normal wifi connection range and maximises speed
- iKConnect creates an 802.11n wireless network onboard with full WEP/ WPA/WPA2 encrypted password protection
- Detachable 5dBi antenna on iKconnect router to footprint boats up to 25m
- LAN and WAN connections for network expansion and other applications - compatible with iKommunicate too
- Also compatible with Fusion marine audio network for Fusion app audio control
- 3G/4G USB modem support coming soon

More and more boaters want access to the internet afloat. Marinas and ports as well as a large number of cafes, hotels, restaurants and service providers offer wifi connectivity but you may just miss that vital connection if you're moored or anchored away from the dock – especially if you're below decks about to enjoy a movie or catch up on email. The WL70 can offer reliable and fast connections up to about ½ mile/1km depending upon conditions. For ranges up to 5-7NM, the more powerful WL510 is available.

The WL70R system is shipping now. Download the manual from [HERE](#)

Part number: ZDIGWL70R (comprises bundle of WL70 and iKConnect router)

UPC: 081159830472

Price: GBP£300/US\$449.90/EUR415
