NavLink US iPad app gets even better charting

NavLink US is a full featured, low cost iPad charting and navigation app which we introduced in April this year. Once installed, it turns the iPhone or iPad into a full function marine navigation device with real time tracking and routing and the ability to support an AIS layer if connected to an AIS system.

It's also fully compatible and supported by our range of NMEA to WiFi servers which bridge on board electronics with the iPad. It can be purchased on the App store and further details are here:

<https://itunes.apple.com/gb/app/navlink-us/id804666182?mt=8>

NavLink US utilises NOAA vector charts. Charts of the whole US continental seaboard and inland lakes are included. However, there are now over 40 new charts including detailed coverage for the whole of Lake Champlain in VT (much requested) , Lake Mead and Lake Tahoe in CA, The St Lawrence river up to Brockville in NY and several new approach scale maps for areas in the Great Lakes (MI).

Here is a screenshot of the new Lake Champlain chart around Burlington.

The full list of new charts is given below with their name, update date and NOAA ENC Chart number:-

Goodnews Bay, 2014-03-31|US4AK84M

San Francisco Bay to Antioch, 2014-06-06|US4CA17M
